BTS^{llc} RAILING SYSTEMS

Vertical sliding guillotine glass wall systems are a new solution for restaurants, cafes and balconies. This system offers an “unobstructed view” maximum clear span, with no vertical frames and a minimalistic horizontal frame. Guillotine glass walls are operated with remote control, without disturbing your customers.

Open windows and still maintain a physical barrier that meets with building regulations without the need of a secondary balustrade or balcony railing. Guillotine glass walls can be opened any amount for total control of natural ventilation while assuring comfort for your clients from gusts of wind. BTS has 2 types of guillotine glass wall systems. A single glass option which is 5/16 in thick glass and an insulated glass option which has 5/32+15/32+5/32 in glass.

- Single Glass Model : 5/16 in Glass
- Insulated Glass Model : 5/32+15/32+5/32 in glass
- Maximum width 11.4 ft, maximum height 9.8 ft for 1 panel
- Ready product option according to your dimensions
- Profiles and accessories can be sold separately
